TO WHOM IT MAY CONCERN

Northcross Intermediate School has just completed a seven month contract with Shakthi Construction who have recently finished a ten classroom upgrade.

Their brief was to convert ten single classrooms into multi teaching spaces and also cover two 20 by 20 metre spaces between the classrooms.

From the outset, Shakthi were very proactive in working with the school on construction cost saving initiatives without compromising the quality of the build.

They worked very closely with the Board of Trustees and staff on building progress, health and safety, any price variations endeavouring to keep disruption to the teaching and learning at a minimum. The Shakthi construction crew even worked on the weekends.

Any construction issues were discussed openly and problems resolved promptly.

The classroom upgrades were completed on time, within budget and built to an exceptionally high quality of workmanship. Our students and staff are now enjoying excellent, purpose built new learning spaces.

It has been a real pleasure working with Rishi and Raj from Shakthi Construction, they have a fantastic knowledge of the building industry and are sensitive to the requirements of working within a school environment.

I would have no hesitation in recommending Shakthi Construction to any organisation seeking quality contractors for any construction needs.

Yours sincerely

J F Tredray

Principal
